climate finance refers to
the **financial resources**
mobilized to help developing
countries **mitigate** and **adapt** to the
impacts of climate change

GLOBAL LANDSCAPE OF CLIMATE FINANCE 2015

Landscape of Climate Finance 2015 illustrates climate finance flows along their life cycle for the latest year available, mostly 2014, in USD billions

USD 391^{BN} TOTAL

Public risk mitigation measures can entirely offset the increase in tariffs needed to incentivize private investment in geothermal projects

Note: CPI's own elaborations based on project-specific financial models. For more information see full report: <http://climp.lc/1E7A8cM>

- **The Gender Equality for Climate Change Opportunities (GECCO)** initiative is a five-year program launched by USAID and IUCN in 2014 to leverage advancements in women's empowerment and gender equality through, and for, the benefit of climate change and development outcomes.
- **GECCO's energy work** supports the energy sector, and the mitigation sector in particular, to be gender responsive by filling knowledge gaps for integrating gender into the energy sector through sharing existing practices and encouraging documentation of experiences and new knowledge creation.
- **GECCO's finance work** aims to ensure that women's mechanisms/machineries, organizations, and groups at national level benefit directly from climate finance

More Information

GECCO Energy is open to all! Women and Men are welcome to join. If you are interested, please contact us:
