Why Green Banking?

Our objective:

- Increase the availability and use of financing instruments for RE and EE projects
- Increase willingness of financial institutions to get involved in RE and EE finance
- Facilitate accessibility to global climate finance options

Your opportunity:

- Benefit from new business opportunities in the growing green markets of your country
- Exchange experiences with experts from Germany
- Contribute to climate change mitigation
What does Green Banking (GB) offer?

- Online trainings
- Trainings in India, Indonesia, Philippines, Thailand and Vietnam
- Delegation tours & B2B meetings in Germany
- “Green Finance Specialist” degree
- Train-the-Trainer Seminars at RENAC‘s Training Centre in Berlin
Main findings of the first GB trainings-cycle

- Initiation of “bankable” support policies for RE and EE are key for the creation of a market

- Financial institutions have yet to develop:
  - “System trust” in national support policy frameworks
  - Trust into longevity of RE and EE technologies and processes

- Understanding and implementation of Project Finance technique is not well-established in financial institutions in Green Banking target countries (except in IN)

- Access to long-term funding at reasonable refinancing costs is important

- Development banks such as ADB and KfW are involved in landmark transactions to help unlocking the markets (e.g. VN, PH)
