CHILE

MADRID 2019

UN CLIMATE CHANGE CONFERENCE

This event will showcase success stories and outcomes from Asian countries (Vietnam, Mongolia, China, Sri Lanka) on vertical linkage / national and sub-national integration, city climate action planning and green cities through various initiatives.

It will cover processes adopted, challenges and lessons learnt in city-level climate action planning and integration of local level climate action in NDCs. And enable knowledge sharing and deliberations in the form of a panel discussion featuring distinguished government and city representatives from various Asian countries.

The Asia LEDS Partnership, through its Communities of Practices (Grid-scale renewable energy, Mobility, NDC Finance, Multi-Level Climate Governance and Building Energy Efficiency) is supporting national and sub-national governments to advance LEDS and NDC targets.
